Assemblies

An **assembly** is a bundle of service(s), inventory, and/or non-inventory items packaged together. This could be for services frequently rendered or can also be created for special deals or promotions.

If you have standard services that contain multiple inventories, non-inventory, or service items, create assemblies to make adding them to estimates and invoices easier.

To create and manage Assemblies, go to **Settings > Inventory > Inventory List**.

Delete an Assembly

Delete an assembly that is no longer in use or was created in error. It is wise to exercise caution when using this function. Deleting an item may have an effect on other functions, settings or data.

If the item has an active status, **deactivate this first**. An active assembly item can not be deleted.

Move to the Inactive Inventory table.
