# Schedule Settings: Task Templates

**Task templates** are useful in situations wherein you have standard tasks or services that are performed in many jobs. Load a saved task template for ease of documentation and report generation. You also eliminate missed tasks due to set-up errors plus you do not have to enter the same information repeatedly when you create similar jobs.

Tasks Templates can be added to other Task Templates and Jobs.

To set up and manage Task Templates, go to Settings > Scheduling > Task Templates.

### Task Templates List/Table

The table has 2 columns:

- Name This refers to the name assigned/given to the Task Templates.
- Task Counts This refers to the number of tasks created in each template.
